

FRANKLIN IMAGING

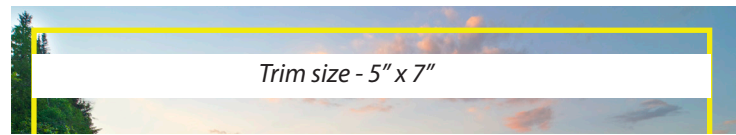

File Submission Guidelines

Use these guidelines to set up your files for the best possible production results.

Setting your files up as suggested will ensure that we can produce high quality graphics in a timely manner.

File Set Up

- Convert all fonts to outlines
- Expand all strokes
- For rich black, build the color: 100%K, 100%C, 100%M, 100%Y
- Add 1/4" bleed to all sides (see example)
- Make sure that all linked files are included or embedded
- The native resolution of each image should be at least 100 dpi at actual size (150-300 dpi recommended)
- PMS colors are matched for a fee of \$30 per color
- Keep all crucial content at least 1/2" inside the trim line (see example)
- All tiled images should be sent to us as 1 piece. We will tile them in production

Size with 1/4" bleed - 5.5" x 7.5"

Upload

- For files less than 8MB, you can email to color@franklinimaging.com
- For files and zipped folders larger than 8MB, please visit www.franklinimaging.com to use our FTP upload tool

Preferred File Formats

We accept all native files in Creative Suite up to version 6.

If you work in other programs, please save your files as high resolution PDF files.

Files that are not set up print-ready are subject to an additional file preparation fee and a delay in production schedule.

Call us with any questions at 614-885-6894.
