HP DesignJet Z-series Printers: **help me choose**

HP DesignJet
25 years reinventing design

High-impact graphics printers

Ideal for:

Copy shops, small PSPs, corporate enterprise and public sector, and retailers.

Your needs:

Need an easy-to-use, high-impact graphics printer—to print tactical and high-quality POP/POS, posters, canvas, roll-up banners, and info graphics, as well as GIS and technical drawings for indoor use—either to sell or for personal business use, effortlessly and affordably.

6 Original HP Vivid Photo Inks

HP high-impact graphics printers have a 6-ink configuration using pigment-based HP Vivid Photo Inks. This configuration is optimized to produce high-impact, eye-catching graphics that are not only water and scratch resistant, but also fade resistant up to 200 years.¹

Memory	8 GB (virtual), ⁶ 160 GB hard disk	64 GB (virtual), ⁶ 320 GB hard disk	64 GB (virtual), ⁷ 320 GB hard disk
Embedded spectrophotometer⁸ Embedded spectrophotometer including closed-loop color calibration for the right color each and every time	No	No	No
HP Optical Media Advance Sensor (OMAS) Allows you to print at top speeds and still get great output results	No	No	✓

Professional photo-quality printers

Ideal for:

Photographers, PSPs, photofinishers, graphic design studios, advertising agencies, and pre-press houses.

Your needs:

Want to produce professional photo and gallery-quality fine art prints, photo enlargements, or concept and contract proofs on a wide variety of media. You need a wide color gamut and confidence that colors can be reproduced accurately and reliably every time.

8 Original HP Vivid Photo or HP Photo Inks

Provides improved color gamut for professional photo-quality prints that require light colors to reproduce soft skin tones and smooth transitions and neutral grays, for stunning color and black-and-white prints.

12 Original HP Photo Inks

To produce gallery-quality fine art reproductions or contract proofs. Twelve HP Photo Inks provide the widest color gamut,¹⁶ superior gloss uniformity, and minimize bronzing,⁹ to provide fine detail that can satisfy even the most discerning art lover.

Understanding your printer specifications

HP ink cartridges	Choose the cartridge size that best meets your printing volumes, whether for occasional print usage or higher volume/unattended print environments
Original HP inks	HP Photo Inks are aqueous pigment-based inks, specially formulated for photo-quality printing; these inks produce water- and fade-resistant prints that can last up to 200 years; ¹⁴ achieve faster drying and enhanced image scratch and water resistance and reduced bronzing with HP Vivid Photo Inks
Maximum roll width	Choose your printer size based on the maximum size of the print that you want to produce or select a larger media width when you wish to print multiple images side-by-side to save media
Print resolution	Enhanced image detail and reduced grain with higher print resolution
Maximum print speed	Become more productive or offer your customers faster turnaround times with higher print speeds
Adobe PostScript®/PDF support and HP Professional PANTONE® color emulation	Designed in cooperation with graphic artists and pre-press professionals, HP Professional PANTONE® color emulation with Adobe PostScript®/PDF support mimics the color choices professionals make when visually optimizing color matches to provide you with better color accuracy and reliability
Ability to print without RIP	No additional software required, meaning no extra costs or training required—just simple, fast printing; print direct using the printer driver, HP Embedded Web Server, HP Instant Printing PRO software, HP DesignJet Click printing software, or via USB 2.0
HP DesignJet Click printing software	For customers with more advanced color management, ICC profile management, image positioning or post-printing finishing requirements, HP has certified a number of Raster Image Processors (RIPs) to handle even the most complex jobs; refer to hp.com/go/designjet for a full list of HP certified RIPs
Memory	Printing is easy with HP DesignJet Click printing software; with one click, you can print PDF, JPEG, TIFF, and HP-GL/2 files; ¹⁵ produce a range of graphics and technical applications, and use automatic features to optimize media usage and help cut costs
Embedded spectrophotometer ⁸	Save time by sending multiple large, complex files to the printer all at once and save files locally on your printer for reprinting later
HP Optical Media Advance Sensor (OMAS)	Generates custom ICC profiles automatically for your preferred paper types, then calibrates the printer to deliver print-to-print and printer-to-printer consistency, under all environmental conditions, and even on unknown (not factory-profiled) paper types
	The HP Optical Media Advance Sensor (OMAS) allows you to print at top speeds and still get great output results; this breakthrough technology improves paper-advance control and accuracy, so the printer can print at higher speeds across multiple environmental conditions without impairing image quality

25 years and counting

In 1991, HP reinvented large-format design, launching the first large-format inkjet printer—named HP DesignJet. This year, we celebrate 25 years and continue to set the benchmark for fast speeds, high-quality output, and continually pioneering new technologies that help our customers work where and how they want.

¹ Print Permanence estimates for the HP DesignJet Z2600 and Z5600 PostScript® Printers by HP Image Permanence Lab based on HP Vivid Photo Inks with the HP DesignJet Z6200 Photo Production Printer. Water resistance performance varies based on printer and print profile. Water resistance testing by HP Image Permanence Lab on a range of HP media and follows ISO 18935 method. Scratch-resistance based on internal HP testing using the Taber and coin test method on a range of HP media. Display permanence rating for interior displays/away from direct sunlight by HP Image Permanence Lab, and by Wilhelm Imaging Research, Inc. on a range of HP media. For more information, see HPLFMedia.com/printpermanence.

² Compared to other HP DesignJet Z-series printers.

³ Compared with large-format inkjet printers under \$25,000 USD for graphic applications. Based on the fastest-rated color speeds as published by manufacturers as of October 2013. Test methods vary.

⁴ For qualified media, see hp.com/go/mediasolutionslocator.

⁵ Maximum rate of output for color image, 100% color coverage (Bandes file). Printed in Fast mode with Economode on, on HP Bright White Inkjet Paper (bond), maximum roll size, with HP Vivid Photo Inks or HP Photo Inks.

⁶ Based on 640 MB RAM.

⁷ Based on 1 GB RAM. Expandable to 1.5 GB RAM through an HP DesignJet qualified SODIMM included only in the optional HP DesignJet PostScript®/PDF Upgrade Kit accessory.

⁸ Embedded in this HP DesignJet Printer is an i1 spectrophotometer from X-Rite. Close collaboration

between HP and X-Rite ensures a reliable solution that's been thoroughly tested to meet customer demands for ease, quality, and dependability.

⁹ See superior gloss uniformity and minimize bronzing on most glossy photo papers with HP Gloss Enhancer. Bronzing is minimized as an image-quality issue when HP Gloss Enhancer is used. HP Gloss Enhancer can be used on photo paper, with the exception of matte-finish papers.

¹⁰ Compared to large-format inkjet printers under \$25,000 for graphic applications. Based on the fastest rated color speeds as published by manufacturers as of January 2010. Test methods vary.

¹¹ The 12-ink HP DesignJet Z3200 Photo Printer is the most advanced printer compared with other HP Z-series printers.

¹² Not included in the box in Asia Pacific for 24-in models.

¹³ Based on 256 MB RAM.

¹⁴ Display permanence rating for interior displays/away from direct sunlight, under glass by HP Image Permanence Lab and/or by Wilhelm Imaging Research, Inc. on a range of HP media. For more information, see HPLFMedia.com/printpermanence.

¹⁵ Once image is selected, one-click printing when printing the entire file without any modifications to the print settings. Applicable to PDF, JPEG, TIFF, and HP-GL/2 files.

¹⁶ Provides the widest color gamut of the DesignJet Z Series printers with 96% coverage of the PANTONE® formula guide solid coated colors when using Original HP Photo Inks and HP Professional Satin Photo substrate.
